

**NEW  
POWER TILLER**

**PACKING A PUNCH.**

***Pinotti***<sup>®</sup>

# POWER BY NAME, POWER BY NATURE.

We want our slopes to be perfect. So we have built a tiller that guarantees long-term slope quality. The POWER tiller has **more tiller teeth. More torque. And more power:** PRINOTH's new POWER tiller.

## RAZOR-SHARP RESULTS

PRINOTH's new POWER tiller packs a real punch. It guarantees unprecedented slope quality and results that are plain to see – and remain so for a long time. A perfectly prepared slope lasts and lasts. While other tillers have about an eight-inch gap between their two tiller shafts, we have built additional tiller teeth. Our new POWER tiller therefore leaves nothing out, tilling across its entire width.

## PERFECT SERVICE

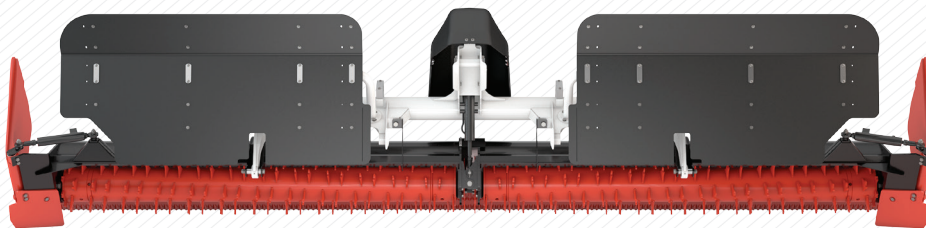

Its optimized structure means that the new POWER tiller requires low maintenance as well as being really simple to operate and adjust. It can be locked in a rigid position from the cabin without the driver having to get out. The tiller teeth are perfectly arranged, reducing fuel consumption, and extremely robust, preventing premature wear.

## A DAZZLING LOOK

The perfect-looking slope? Of course! PRINOTH's new POWER tiller produces deep, fine-grained results that last – much longer than ever before. With its teeth rotated by 5° the POWER tiller can prepare perfect snow packs, facilitating snow infeed into the tiller housing and ensuring an even layer of snow. Two separate hydraulic engines on the left and right (63 + 80 cm<sup>3</sup>) increase the torque on the tiller shafts and boast a total of 143 cm<sup>3</sup>. Side wings are not optional on PRINOTH products – they are integrated as standard.

## TECHNICAL DATA

Available working widths:	4.3 m	4.5 m
Tiller width (tilled width):	4,358 mm	4,576 mm
Tiller width including fixed parts:	5,100 mm	5,320 mm
Tiller width including side finisher:	6,300 mm	6,520 mm
Number of tiller teeth:	2 x 138 teeth	2 x 144 teeth
Tiller drive – hydraulic engine:	63 + 80 cm <sup>3</sup>	63 + 80 cm <sup>3</sup>
Weight:	930 kg	958 kg
